InfraLeuna GmbH | Am Haupttor | 06237 Leuna

HERE BUSINESS MEETS SCIENCE.

LEUNA – chemistry connects

Leuna – this name has now been synonymous with chemistry for more than 100 years. Here, for the first time, methanol was manufactured in the high-pressure process and synthetic fuel was produced on a large scale with brown coal hydrogenation.

More than **100 companies from ten nations** are now working on the chemical industry of the future in **Germany's biggest enclosed chemical park**. They include renowned names such as ARKEMA, BASF, DOMO, Innospec, Linde, TAMINCO (Eastman) and TOTAL, as well as many medium-sized companies. All together, more than six billion euros has been invested at the Leuna chemical site since 1990. The necessary, highly flexible and efficient infrastructure for the whole site is operated by InfraLeuna GmbH.

Dr. Christof Günther, Managing Director of InfraLeuna GmbH

“We will also continue to invest strongly in the development of our infrastructures, so that the companies will find optimal conditions for further growth and new projects at the Leuna chemical site.”
