

CENTER OF EXCELLENCE MAGDEBURG PORT OF SCIENCE

Magdeburg Port of Science | Joseph-von-Fraunhofer-Straße | 39106 Magdeburg

HERE BUSINESS MEETS SCIENCE.

Centre for innovation and knowledge transfer

The old trading port in Magdeburg is conquering new frontiers. With the Port of Science, a centre for innovation and knowledge transfer is being created in direct proximity to the university on the site built by the Elbe at the end of the 19th century. As a new urban quarter, the former port area offers space for science and business but also for living and services, leisure and tourism.

New life is moving into the dockside warehouses. **Research institutions and knowledge-based companies have settled under the roof of the “think tank”.** Additionally, a new research campus for interdisciplinary medical engineering is being developed on the site of former sugar store, with completion due by 2019. So it is a port full of dynamism and change, clearly a CENTER OF EXCELLENCE.

Dr. Lutz Trümper, Lord Mayor of the City of Magdeburg

“With the development of the old trading port into a Port of Science, we are combining living and life with work and research and are creating a new urban quarter with a very special atmosphere. Following extensive investments in the infrastructure and initial new uses, the focus in the coming period of time will be on redeveloping and expanding further warehouses and a direct connection to the campus of Otto von Guericke University.”
