

Medical Engineering Opportunities in Eastern Germany

09.10.2017 - 13.10.2017

From 9 to 13 October 2017, GTAI Germany Trade & Invest will hold a series of events on the subject of medical technology - cluster opportunities in Eastern Germany in the USA. Together with companies from the state, IMG Saxony-Anhalt will also be presenting the federal state of Saxony-Anhalt as economic and scientific location in the field of medical technology.

Station will be the Two Cities Minneapolis and St. Paul, Minnesota.

Other participants come from the federal states of Berlin/Brandenburg and Saxony.

Organization: Germany Trade & Invest (GTAI)

Featured companies from Saxony-Anhalt:

- Forschungscampus *STIMULATE*
- HASOMED GmbH
- Nielsen Tele Medical GmbH

Press Kit

Stay up to date about the medical engineering location Saxony-Anhalt.

> **Press Release: Well-connected location for medical technology in Germany - Saxony-Anhalt promotes itself in the USA**

> **research campus STIMULATE: A stimulating focus on the small things**

> **vib.Innovation: Good Vibrations - company from Saxony-Anhalt develops unique therapy devices for clinical use**

> **SpinPlant: Biological scaffolds for regenerative medicine**

A Young German State sets out to save Old Age

Medical Engineering Region Saxony-Anhalt

(...) A model region for independent living in old age is being established in Saxony-Anhalt. A model that suggests medical companies are really tech companies. That healing is as much about data as about band aids.

Enter Nielsen. (...) (read the full article)

Discover the Cluster Medical and Health Technology and the medical engineering region Saxony-Anhalt

The area of health and medical science is one of the five lead markets defined in the innovation strategy for the federal state of Saxony-Anhalt. There are many driving forces for innovation in the medical technologies that are the key to competitive products in this future market. One central factor is a high medical demand, mainly as a result of demographic change and a significant increase in the prevalence of chronic illnesses. Other aspects are the trends to more individualisation, miniaturisation and biologisation.

The outcome of this is a significant technological and medically demand-oriented “innovation potential” that businesses in Saxony-Anhalt can capitalise.

The main goal of the Cluster Medical and Health Technology is to strengthen the competitiveness of Saxony-Anhalt as a leading region for medical technologies. Joining medical-technical businesses and research institutions in a cluster will help to more efficiently develop improved and innovative diagnostic and therapeutic methods as well as medical-technical equipment.

Focus points are therefore to intensify knowledge transfer and innovative activities by strengthening existing research and development cooperation between companies and research institutions. The integration of expert knowledge and state-of-the-art technologies in regional companies will result in long-term innovative products.
