

HERE THE CHEMISTRY IS RIGHT.

STRENGTHS OF THE CHEMICALS LOCATION OF SAXONY-ANHALT

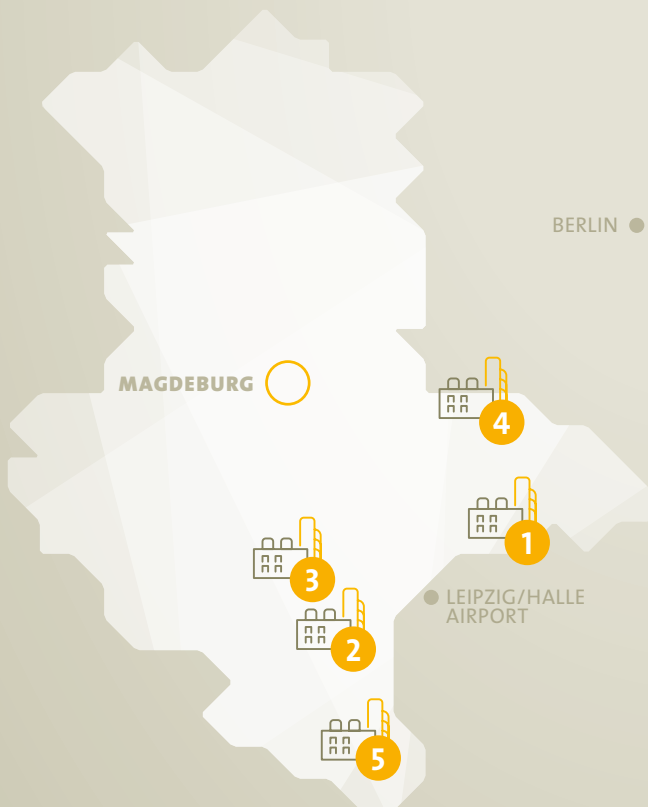

Central German Chemical Triangle: the chemicals and plastics industry's traditional and innovative site in the centre of Europe

Raw materials: companies benefit from the feedstock integration and material-specific know-how at the chemical sites

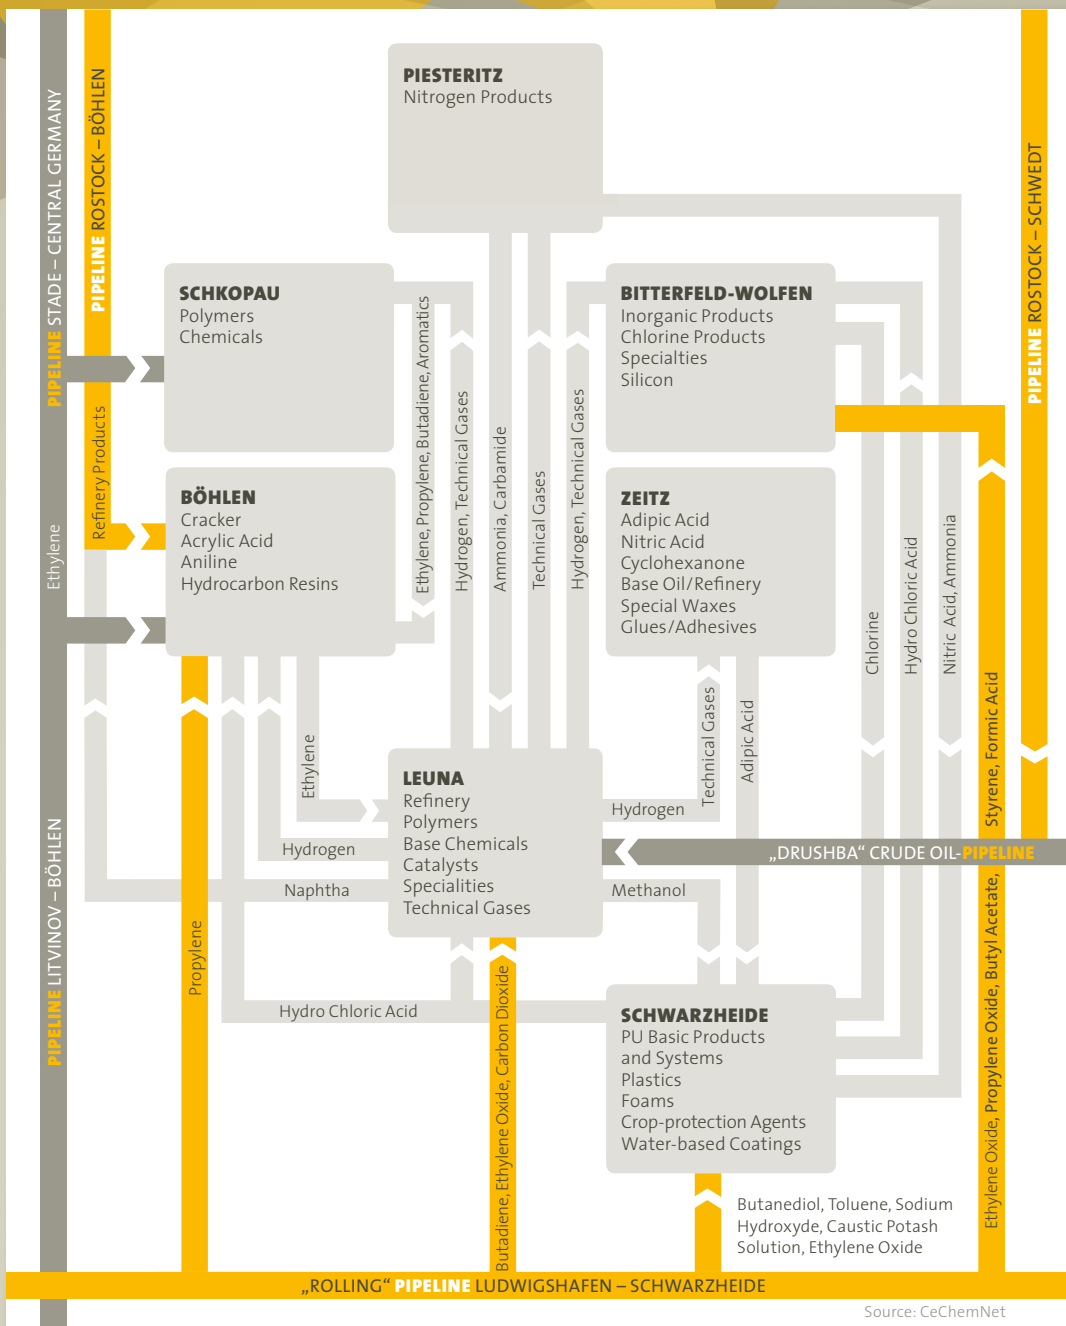

Plug&Play efficiency: the chemicals concept allows and supports local companies to focus on their core area of business

Training, research and product development: in companies, universities, colleges and at research institutes such as Max-Planck and Fraunhofer
