

HERE ENERGY MEETS EFFICIENCY. SAXONY-ANHALT

CLEANTECH SAXONY-ANHALT

Clean technologies against climate change – reduction of CO₂ emissions and energy efficiency are the keys of industry transformation. Saxony-Anhalt provides resources, technologies and industry applications in a model region of renewable energy. The biofuel production capacity for example is leading within Germany. Six areas of expertise in Saxony-Anhalt accommodate cleantech technologies to a particular degree:

ENERGY GENERATION

ENERGY STORAGE

ENERGY EFFICIENCY

RAW MATERIAL/ MATERIAL EFFICIENCY

CIRCULAR ECONOMY

WATER INDUSTRY

STATE OF RENEWABLE ENERGY

Saxony-Anhalt takes a leading position in Germany when it comes to expanding renewable energies. In 2019, the share of renewable energies in gross electricity generation was 58.1 percent and has already reached the federal target for 2030. This also has positive effects on the labor market. Renewable energies offer over 24,000 jobs in the country.

LOCATION ADVANTAGES

- **Saxony-Anhalt has already attracted global players** like Hanwha QCells, IBM, Dow Chemical, Dell, Bayer, Total, Enercon, Cargill, VERBIO, Meyer Burger.
- **3.26 billion euros of foreign direct investment** funded by the GRW Regional Aid* since 2000 alone prove that Saxony-Anhalt is an attractive location for international companies.
- **Saxony-Anhalt is part of the largest market** within the EU, Germany with 83 m customers.

WORKFLOW PROFILE

- **Qualification:** 90 % of all employees are highly skilled and possess a vocational or university degree (OECD average: 71%)
- **Productivity:** Saxony-Anhalt has the highest productivity rate of all East German federal states.
- **Loyalty:** high motivation and company loyalty, employee turnover <1%

THE PERFECT LOCATION FOR INVESTMENTS IN SUSTAINABLE PRODUCTION.

* GRW funds support you in commercial investments and investments in municipal business-related infrastructure.
