> New inhibitor found to combat drug-resistant cancer cells 08.03.2021

A new substance could improve the treatment of persistent cancers. Researchers at Martin Luther University Halle-Wittenberg (MLU) and the University of Greifswald have developed a new inhibitor that makes drug-resistant tumour cells respond again to chemotherapy. The new substance blocks a protein in the cancer cells that normally transports the cancer drugs back out of the cells. The results were published in the scientific journal "Molecules".

> Capital increase at ThermHex 22.02.2021

ThermHex Waben GmbH increases its capital to 1 million euros. The shareholders' meeting of the parent company EconCore NV had already approved this in 2020. The increase of 900,000 euros has now been entered in the commercial register before the end of the financial year. With the very successful financial year and the capital increase, ThermHex is strengthening its position in the market.
