

# September 25th 2010 "Day of Energy"

23.07.2010

On this day numerous companies, universities, research institutes, museums, municipal utility providers and energy facilities are opening their doors. They will be giving insights into new developments, research projects and production processes. Of course, there are also many more opportunities to get involved: your support is needed too. Join in on 25 September and communicate the forward looking developments in the energy sector to young people above all – through projects, events, competitions, exhibitions or discussions about issues concerning the future of energy.

Taking part is simple: enter your event in our event calendar under [www.zukunft-der-energie.de](http://www.zukunft-der-energie.de). You will thus become a partner in the Science Year Energy – if you aren't already.
